

From AI Accelerator to Repeatable Practice IP

CTO interview one-page narrative

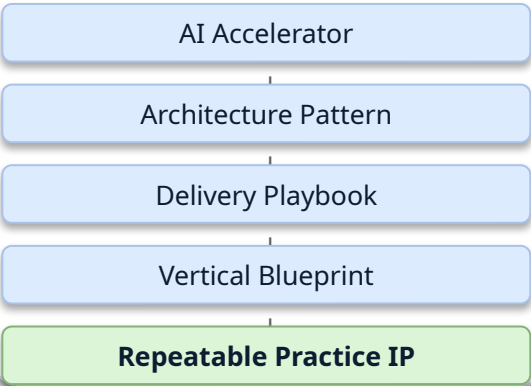

Executive Thesis

Problem: AI pilots stay bespoke and hard to scale.

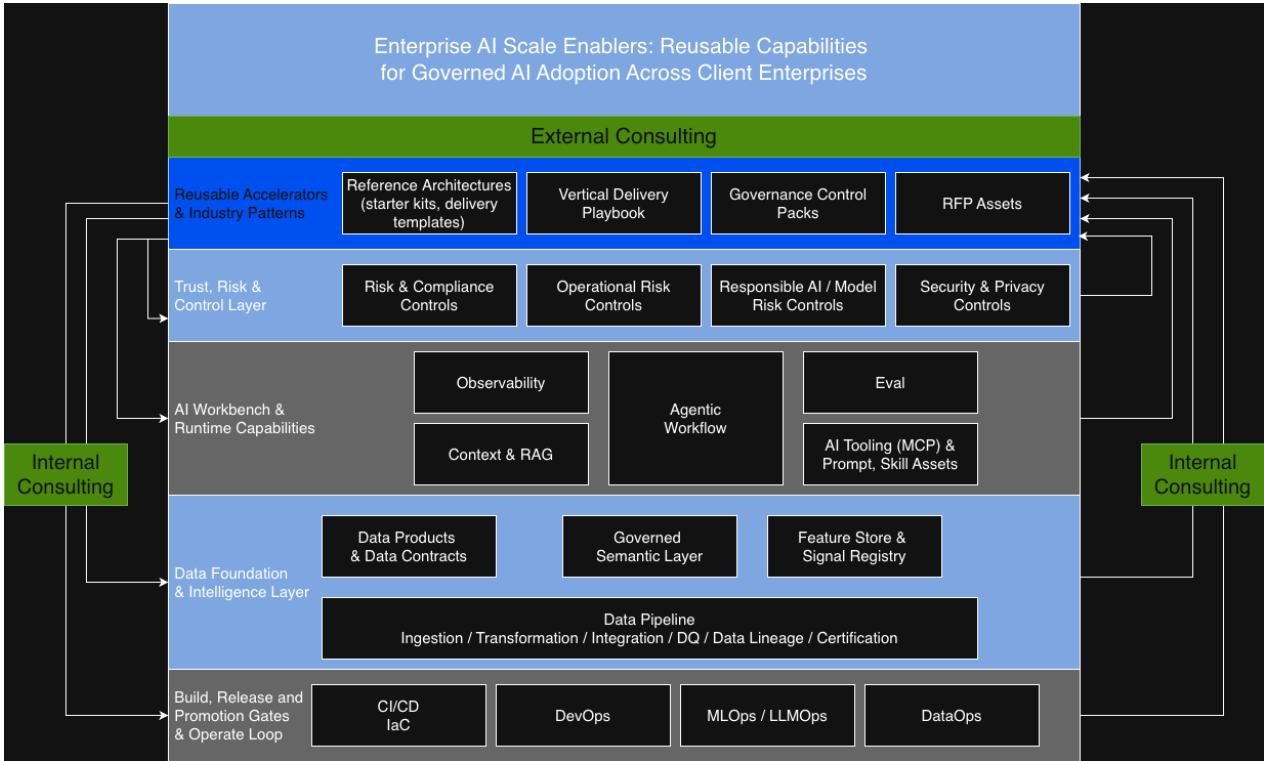

Shift: Convert delivery know-how into reusable practice IP.

Result: Faster solutioning, safer delivery and lower cost-to-serve.

Conversion logic

Enterprise AI Scale Enablers - reusable capabilities for governed AI adoption

What this gives Tech Mahindra

GTM leverage

Sharper RFP narratives, reusable solution stories and stronger client confidence.

Delivery leverage

Faster mobilisation, less reinvention and consistent engineering patterns.

Control leverage

Governance, security, risk and auditability embedded from the start.

Commercial leverage

Lower cost-to-deliver and scalable cross-vertical practice IP.

Positioning line: I help convert AI delivery capability into repeatable, governed, enterprise-grade practice IP.
